Art Unit: 2621

DETAILED ACTION

1. Applicant's amendment filed 3/2/04 has been entered and made of record.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama (Patent No. 6,014,095).

The advanced statement as applied to claim 1 in the previous Office Action, paper #4, is incorporated herein.

Regarding claim 16, it is noted that this claim recites similar features called for in claim

- 1. Thus, claim 16 is also rejected for the same reasons as set forth in claim 1.
- 4. Claims 8 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukuzawa (Patent No. 5,933,536).

The advanced statement as applied to claim 8 in the previous Office Action, paper #4, is incorporated herein.

Regarding claim 17, it is noted that this claim recites similar features called for in claim 8. Thus, claim 17 is also rejected for the same reasons as set forth in claim 8.

- 5. Claims 2-7 and 9-15 are allowed.
- 6. Applicant's arguments filed 3/2/04 have been fully considered but they are not persuasive.

Application/Control Number: 09/802,944

Art Unit: 2621

In reply to Applicant's remarks in page 11 last paragraph with regard to claim, the examiner disagrees because Yokoyama does teach these features as pointed out in the claim rejection section. For example, in Yokoyama, the coefficient input to the coder 102 shown in figure 6 corresponds to the so called "block data consisting of a plurality of image signal into combined data in accordance with scanning sequence"; the zero-run followed by level mentioned in column 9 lines 29-38 corresponds to insignificant coefficients followed by significant coefficients.

In reply to Applicant's remarks in page 14 first paragraph with regard to claim 8, the examiner disagrees because Fukuzawa does teach these claimed features as pointed out in the claim rejection section. For example, Fukuzawa teaches a bit stream register (see "FF" shown at 2 in figure 4 and mentioned in col. 7 lines 1-3 for storing bit stream), table memory (see table 8 of figure 4 and mentioned in col. 7 lines 23-43 and 49-53), a data reader (see item 6 of figure 7 and its corresponding text portion in col. 7 line 13-26); and an address generator (see the shifter 6 of figure 4 in together with text portion mentioned in col. 7 lines 18-26 and 49-65).

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number: 09/802,944

Art Unit: 2621

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M Dang whose telephone number is 703-305-1464. The examiner can normally be reached on Monday to Thursday from 6:30AM to 5:00PM..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H Boudreau can be reached on 703-305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
